Organized by:

STRENGTHENING PAKISTAN'S ALUMINIUM FUTURE

28-30 MAY 2027

Expo Center Lahore, Pakistan

From raw materials & recycling to finished products, machinery and manufacturing technology.

INDUSTRY BRIEF

GLOBAL SOURCING. LOCAL VALUE ADDITION.

Pakistan's aluminium market connects imported feedstock with a broad domestic processing and manufacturing base.

Without a large established primary-aluminium smelting base, Pakistan relies on imported metal, alloys, scrap and selected semi-finished products. Local businesses transform these inputs through recycling, extrusion, casting, machining, finishing, packaging and fabrication.

Pakistan has a broad and increasingly diversified aluminium downstream ecosystem. The country fulfills its domestic demand through imported primary aluminium and semi-finished products, imported aluminium scrap, secondary alloy production, extrusion, casting, die casting, machining, finishing, packaging and many fabricated products. This structure creates both a mature market for existing manufacturers and a significant opportunity for local value addition.

The demand side is broad. Construction and manufacturing are recovering, automotive production rose sharply during July to March of financial year 2026, Pakistan is experiencing very rapid solar deployment, and the national New Energy Vehicle Policy 2025-2030 creates a long-term framework for electric mobility. These trends reinforce demand for aluminium profiles, structural parts, die castings, battery and motor housings, solar mounting systems, electrical conductors, packaging and lightweight components.

DEMAND ACROSS MULTIPLE INDUSTRIES

CONSTRUCTION

Windows, façades & building systems

AUTOMOTIVE & EV

Castings, housings & components

SOLAR & ENERGY

Mounting profiles, frames & enclosures

ELECTRICAL

Rod, wire, conductors & busbars

PACKAGING

Cans, foil, tubes & containers

MANUFACTURING

Engineering, machinery & consumer goods

THE ALUMINIUM VALUE CHAIN

From material to market. Connect with the businesses that supply, transform and apply aluminium across Pakistan's manufacturing economy.

01

METAL & FEEDSTOCK

Primary aluminium, ingots, billets and alloys; scrap, sheet, coil, foil and other semi-finished inputs.

02

RECYCLING & SECONDARY ALLOYS

Scrap sorting, remelting, alloying, filtration, degassing and recovery; secondary alloy ingots.

03

PROCESSING & FORMING

Extrusion, rolling, casting and die casting; profile, sheet, wire, rod and component production.

04

FINISHING & PRECISION ENGINEERING

CNC machining, tooling, anodizing, powder coating, polishing, fabrication, assembly and inspection.

05

FINISHED PRODUCTS & APPLICATIONS

Architectural systems, cans and packaging, automotive parts, solar structures, electrical and industrial products.

THREE ROUTES TO INDUSTRIAL OPPORTUNITY

LOCALISE.

Materials, conversion & components

UPGRADE.

Processes, technology & quality

EXPORT.

Higher-value manufactured products

EXHIBITOR PROFILE – MATERIALS & PRODUCTS

WHAT WILL YOU SHOWCASE?

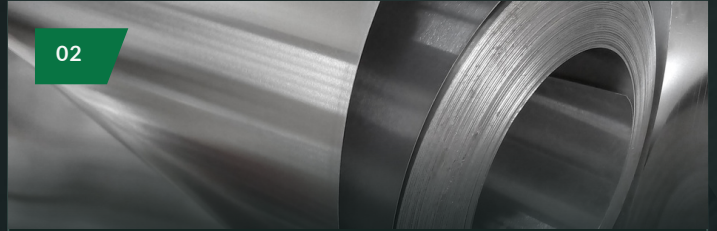

A dedicated platform for companies that supply aluminium, process metal or manufacture finished products for industrial and commercial markets.

01

PRIMARY METAL, ALLOYS & RECYCLING

Primary aluminium, ingots, billets, alloy metal, secondary ingots, aluminium scrap, recyclers and metal traders.

02

SHEET, COIL, FOIL & SEMI-FINISHED PRODUCTS

Plate, sheet, coil, strip and foil; bars, rods, wire, tubes, pipes, fittings and extruded profiles.

03

DOORS, WINDOWS & FAÇADE SYSTEMS

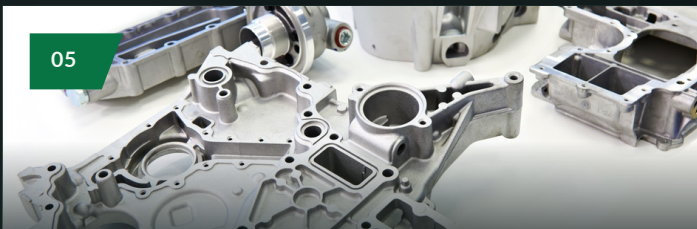

Aluminium doors and windows, curtain walls, façades, cladding, composite panels, louvers, frames and architectural hardware.

04

CANS, FOIL PACKAGING & CONTAINERS

Beverage cans, foil containers, food trays, pharmaceutical foil, collapsible tubes, cartridges and aluminium packaging.

05

AUTOMOTIVE & ENGINEERED COMPONENTS

Die-cast and machined parts, engine and motor housings, battery trays, thermal-management parts and industrial enclosures.

06

ELECTRICAL, SOLAR & CONSUMER PRODUCTS

Conductors and busbars; solar rails, frames and clamps; cookware, furniture, lighting, signage and industrial sections.

EXHIBITOR PROFILE – MACHINERY & TECHNOLOGY

THE TECHNOLOGY BEHIND THE PRODUCT.

MELTING, RECYCLING & RECOVERY

Sorting, shredding, melting and holding furnaces; degassing, filtration, dross recovery and energy-efficiency systems.

EXTRUSION & BILLET PREPARATION

Extrusion presses, billet casting and heating, homogenising and ageing furnaces, pullers, handling and run-out systems.

ROLLING, SLITTING & FOIL CONVERSION

Rolling mills, sheet and coil processing, slitting, cut-to-length, annealing, foil laminating and converting equipment.

CAN-MAKING & PACKAGING MACHINERY

Can-body and end-making lines, tube and container forming, foil-tray presses, printing, coating and inspection systems.

WINDOW, DOOR & FAÇADE FABRICATION

Cutting, drilling, milling, punching, crimping and assembly equipment; profile machining and façade fabrication systems.

CASTING, DIE CASTING & CNC

Casting and high-pressure die-casting machines, trimming, machining centres, lathes, milling and precision component equipment.

SURFACE TREATMENT & FINISHING

Anodizing, pretreatment, powder coating, polishing and brushing; coating application, curing and surface-process systems.

TOOLING, AUTOMATION & QUALITY

Dies, moulds, fixtures, robotics and handling; spectroscopy, metrology, mechanical testing and production inspection.

VISITOR PROFILE

MEET THE INDUSTRIES THAT BUY ALUMINIUM.

For the professionals who specify materials, source components, invest in machinery and develop finished products.

TARGET VISITOR SECTORS

CONSTRUCTION & ARCHITECTURE

Builders, developers, architects, façade specialists and glazing contractors.

AUTOMOTIVE & EV

Vehicle assemblers, component makers, EV and battery-system companies.

SOLAR & RENEWABLE ENERGY

Solar EPCs, installers, developers and mounting-system manufacturers.

ELECTRICAL, CABLE & POWER

Cable makers, utilities, electrical contractors, switchgear and equipment companies.

PACKAGING & CONSUMER GOODS

Food, beverage, pharma and cosmetics; packaging converters and cookware makers.

INDUSTRIAL ENGINEERING

Machinery, HVAC, automation, lighting, transport and precision-engineering businesses.

PROCESSORS & MANUFACTURERS

Recyclers, extruders, foundries, die casters, fabricators and machine shops.

TRADE & DISTRIBUTION

Metal importers, exporters, stockists, agents, distributors and industrial buyers.

THE DECISION MAKERS

- CEOs, owners & managing directors
- Plant, production & quality managers
- Architects, consultants & specifiers
- Commercial, import & export managers
- Procurement & supply-chain managers
- Materials & metallurgical engineers
- Mechanical & manufacturing engineers
- Project & technical procurement teams

SOURCE MATERIALS. COMPARE TECHNOLOGY. BUILD RELATIONSHIPS.

WHITE PAPER
SUMMITS

WHY EXHIBIT

TURN MARKET ACCESS INTO OPPORTUNITY.

GROW YOUR PAKISTAN BUSINESS

Introduce materials, products and technology to the country's aluminium supply chain.

REACH BUYERS ACROSS SECTORS

Connect with manufacturers, processors, specifiers and commercial buyers.

BUILD DISTRIBUTION PARTNERSHIPS

Meet potential agents, importers, distributors and local industrial partners.

SHOW WHAT YOUR COMPANY MAKES

Present finished products, process expertise, machinery and manufacturing solutions.

STRENGTHEN CUSTOMER RELATIONSHIPS

Use face-to-face conversations to support existing accounts and new business.

EXPLORE LOCAL VALUE ADDITION

Discuss sourcing, conversion, technology and manufacturing opportunities.

BOOK YOUR STAND

28-30 MAY 2027

Expo Center Lahore, Pakistan
